Subject: [External] traffic calming circles

Hello,

I live at 2474 N 68th St, right near the 4-way stop on 68th and Wright. I'm happy to hear about the circles being installed at Meinicke and Clarke, though I hope they're a bit smaller than the circles formed by those traffic barrels/cones that were sitting there for weeks. People didn't know how to turn because there didn't seem to be enough space to go all the way around, so most of the time people turned left by going to the left of the circle.

However, my real concern in writing is the 4-way stop sign at 68th & Wright. For those of us living on or near the corner, the sound of cars breaking and then accelerating 24-7, especially during rush hours, is very annoying and it also produces a lot of fumes, so we keep our front windows closed. With the traffic circles, will the stop signs be coming down? Or could a circle be placed there as well, or instead of one of the others?

Thank you,
Roberta Coles
