BOARD OF BUILDING AND FIRE CODE APPEALS

FRIDAY November 14, 2025

Via Zoom

Time: Nov 14, 2025 09:00 AM Central Time (US and Canada)

Join Zoom Meeting

<https://servetosa.zoom.us/j/85885059666?pwd=KaUm967K41ObLdlRwTCFT6rjDJfiHt.1>

Meeting ID: 858 8505 9666, Passcode: 7725

Property owner Therese Hanson is requesting a variance from the Wisconsin Uniform Building Code (UBC) related to second-floor ceiling height requirements. The existing roof rafter configuration limits the ceiling height of 6 feet 8 Inches or greater to 38% of the total floor area, while the code requires a minimum of 50%. Achieving compliance would require a full roof redesign.

Relevant Code:

UBC Ch VII, Sect. 30.55(7) (b.)4.: 6'-8" (80") is the required for 50% rather than 7'-0" (84").

UBC Ch VII, Sect. 30.55(1.) Purpose. The purpose of this chapter is to provide uniform minimum construction regulations for alterations and remodeling of existing one and two-family dwellings built prior to June 1, 1980.

UBC Ch VII, Sect. 30.55(7) (b.) Partially Finished Attic Conversion to Habitable Space, Second Floor Levels

1. Design floor load: All new areas shall meet forty (40) pounds per square foot live load plus dead load. If fifty percent (50%) or more of the existing habitable space is altered or remodeled, the existing floor shall also meet the minimum design live load of forty (40) pounds per square foot.

(As the 2nd floor was also existing, the alteration of the 2nd floor is below the 50% of the total floor area)

4. Ceiling height: All habitable rooms shall have a minimum ceiling height of six (6) feet eight (8) inches for a minimum of fifty percent (50%) of the floor area. If fifty percent (50%) or more of the existing habitable space is altered or remodeled, the ceiling height requirements shall also apply to the existing space.
