1. mayfair road is so congested at this time..you keep allowing projects that keep adding to the congestion on this overcrowded street...I use that area everyday several times a day and it is at its maximum right now
2. please post links to the site plans, floor plan and building elevations. Please be sure they include dimensions and any site calculations.
3. With this, I hope that you will fix the northeast corner of Wisconsin Ave and Hwy 100. There should be three dedicated lanes at the light: left turn, a center lane to go into the gas station across Hwy 100 and a dedicated right turn only lane (currently not there). It only takes one person going straight into the gas station to back up a lot of traffic (wanting to turn north onto Hwy 100), especially during rush hours. Additionally, the left turn light (from southbound Hwy 100 onto eastbound Wisconsin Ave) will stay red even when there are long times of no northbound traffic on Hwy 100). These should be re-timed, or made a blinking yellow arrow (if that's allowed over all of the lanes) so that one doesn't have to wait minutes to cross.
