I drop off kids to West and then Whitman every morning. From Mayfair Rd, I drive west on Center St, turn left/south onto N 114th street, left/east on W Clarke St, left/north onto N 113th St and finally right/east on Center St again. I do not like cars parked on 114th during drop off so I suggest not allowing parking from 7:15 am to 8:00 am Mon - Fri. With cars parked on 114th kids are walking further into the road until they get to the sidewalk, and we don't have a "drop and go" area. It is more unsafe when there are piles of leaves and snow. I also suggest allowing parking on only one side of W Clarke St because crossing and turning is extremely hazardous because we can't see oncoming cars and there is only one lane of traffic when cars are parked on both sides. We need to encourage people to park on the west side of N 113th street because that entire block has a sidewalk and currently no one parks there. I like the idea of markers (try colored curbs) for no parking because it is too close to intersections and driveways.

I DO NOT agree with the proposed changes. KEEP THE ORIGINAL ORDINANCE- NO CHANGES. The ADDITIONAL safety hazards it presents to our neighborhood dramatically outweigh the change in ordinance. I see what happens everyday, all day. I work from home and have a focused view of what directly happens. Along with garbage, noise, congestion, fighting!!!

This is also another step to bring in sidewalks which is ABSOLUTELY PROTESTED by our neighborhood.

Because every student has to have their own car now IS NOT the property owners issue. There are only so many spots at the TWHS. Car pool, walk, bike. Ride the bus!!!! STOP MESSING WITH OUR NEIGHBORHOOD!!!!!!!!!! NO PARKING!!!!

It is amazing this Committee would even consider this change. Has anyone on this committee ever even driven down one of the streets identified for this ridiculous idea. Who are you trying to appease with this idea - the students, their parents, or who?

If you want to consider a CHANGE make the parking on Clarke St. allowed only on one-side of the street. Anyone that actually took the time to drive down these streets would understand what is really needed. And allowing expanded parking, is NOT one of those things.

And do NOT even consider adding sidewalks to your scheme in this parking change.

I am not opposed to allowing parking on ONE side of 114th Street during school hours. What does concern me is parking on both sides of the road on West Clarke Street. The road is not large enough to accommodate parking on both sides and traffic both ways. Crossing or turning on this road during the school day is extremely hazardous, as you are unable to view if the road is all clear until your front bumper is already in the middle of the street. Ideally, I believe there should be parking on one side of 114th Street AND parking on one side of Meineke, with markers on the curb to assist drivers in determining whether they are parked too close to the intersection or not. I am truly concerned for my safety and the safety of others when Meinecke is double parked.

Parking is already tight. How often will parking checkers come by to make sure that no one is parking within four feet of driveways as stated in Section 11.32.030(E) of the City's municipal code? I love the thought of the officials here try to walk around the block before school starts or just lets out during the week. No sidewalks + double sided parking + parents running behind to drop their kids off will be... interesting. Also, how much space will be available to emergency response vehicles in case they need to park an engine/ladder/truck and let an ambulance past with a patient in a critical condition.

I leave for work at 7:30 AM M-F and the CURRENT situation is difficult. I have to look out for students going to school, parents with tiny children heading back from dropping someone off at school, and neighbors rushing to the schools or to work. Leaving my driveway is quite intense. adding parking on BOTH sides will make it even more dangerous for everyone because of the blind spots that will create.

I offer a solution: Open up parking on the northbound side of 112 in our neighborhood. This road is underutilized by everyone and because it is not a direct route to the elementary school or high school so there is NO pedestrian traffic.

I extend an offer the transportation affairs committee to come by my house for breakfast at some point and we call all try backing out of my driveway from 7:30 - 8:30 on some weekday.

Dear Committee, I am writing to express my strong opposition to the recent trial to allow street parking near the school during school hours. As someone who lives close to the school, I have witnessed firsthand the heavy traffic congestion in the mornings, which is already difficult to manage due to the narrow streets. Allowing cars to park during these hours would only exacerbate the problem, making it even harder for residents and school staff to navigate the area safely.

Additionally, with so many children walking to school, adding more parked cars along the street would significantly increase the risk of accidents. The limited visibility and restricted space for both drivers and pedestrians would create an unsafe environment, particularly for young students.

I urge you to reconsider this decision in the interest of public safety and traffic flow.

Thank you for your attention

Walking my daughter to and from Eisenhower is already a difficult task due to the dangerous, irresponsible driving that occurs down 115th St. Without sidewalks and now adding in parked vehicles, walking in the grass has been our only solution. If this continues, walking her to and from school in winter is going to be even more difficult. Additionally, leaving my house during the morning rush is also not an easy task with a car parked directly in front of my driveway - this makes it hard to efficiently back out without hitting someone or another vehicle.

Parking was restricted on 115th St. years ago for a reason - litter, blocking of driveways, mailboxes, etc. The committee should request the number of parking tickets issued to cars during this time that have parked too close to the fire hydrant (which needed to be accessed during a water main break a few weeks ago) and too close to the sidewalk.

Currently, when the leaves are in the street and cars are parked along one side, it effectively turns this into a one lane street. What happens when it snows and there's blockage on both sides of the street? There isn't room for two cars to pass plus cars on one side plus students and parents trying to walk amongst all this traffic safely. 116th is a much wider street to accommodate parking versus the other arterial streets.

I am strongly opposed to this “solution” to parking, before this, driving the neighborhood during school hours was a nightmare, now I don’t even have words to describe what a nightmare even getting out of my driveway is at 8 am when cars are driving both ways and i have parked cars on my sidewalk. This is unacceptable, so unsafe even for the students walking, I have to watch them walk in my grass everyday for their own safety. Plus what about winter how is the plowing going to work. I understand you are looking for parking solutions but this definitely is not one.

I am OK with all day parking on 113th, 114th, & 115th, however, the sidewalks were put in for the drop off of school children, so there should be no parking at all on the sidewalk stretch on these three streets.

There should be no parking at all on Center Street, as the cars block the mailboxes, and the mailman has to get out of his truck to deliver mail. This is dangerous for the mailman; especially in the winter. (Sometimes we don't even get our mail, if the mailman cannot get to our mailboxes)

So today 1/10/2025, well after the 90 day trial should have ended, it snowed. The salter went by, but because of all the parked cars, the west side of the street did not get salted.

It's December so we have several months to look at this proposed change. If the intent was to lessen the parking on Clark, this hasn't worked. There is just more parking congestion on the side streets, making it more dangerous for the kids to walk to school. This is not a good solution to ease the parking mess around the schools.
