This proposal is putting the "cart before the horse." The calendar should serve the legislative process, not dictate it. The city attorney mentioned that "a larger package is coming in the Fall," and the calendar should be adjusted at that time to accommodate the process. Additionally, I have yet to receive a response from City Staff regarding the process improvement proposal memo I submitted in October 2023 and why it never made it to the agenda. Who denied the proposal from coming before the committee? City staff and alders have also had not response to my request for a process workshop that could be attended by the public to through the legislative process further.

This entire process lacks transparency. This item, along with all other process items, should be held until the Fall when the full process framework is introduced.
